Skills

IT Governance

- ❖ SOX compliance
- ❖ Forecasting, budgeting and procurement
- ❖ Vendor relationships
- ❖ Network and server infrastructure planning and implementation

OS/Web

- ❖ Mac, Windows and Linux
- ❖ Project planning and management
- ❖ PHP, HTML and CSS
- ❖ MySQL
- ❖ Apache

Networking/Telco

- ❖ Cisco IOS (switches, routers and firewalls)
- ❖ Avaya phone systems
- ❖ DNS/SSL management

Software

- ❖ Adobe Creative Suite
- ❖ Google Apps
- ❖ Microsoft Office
- ❖ All Apple Apps
- ❖ Omni Apps Suite
- ❖ An assortment of server technologies

Profile

Information technology professional with creative talent, analytical abilities, great people skills and over 15 years of industry experience in technology solutions and support.

Professional Background

Director of IT, The Integer Group Denver, CO & Des Moines, IA 2004 - 2012

Over the past six years, I've helped Integer realize the value IT has — not just from a commodity standpoint, but from a strategic business perspective. I have worked directly with executive management and IT staff across all the Integer agencies to ensure we are proactive about technology and providing our associates and clients with the best solutions available.

I am a firm believer that collaboration tools improve the efficiency of the enterprise space and ultimately make an organization stronger and more profitable. Recently, I orchestrated the migration of over 1,000 users to Google Apps. Through the use of Google's extensive APIs, we heavily integrated it with our internally developed web applications.

Currently, I oversee the development and maintenance of seven PHP/MySQL web applications used across all of the Integer agencies and by many of our clients. These tools are key contributors to the success and daily operation of Integer.

I have had the pleasure of working on a wide array of projects while at Integer. In 2004, I assisted coordinating the construction of a new 120K SF facility — as well as the subsequent move of our infrastructure, hardware, furniture and 450 associates. In 2008, I coordinated the construction of a 20K SF addition at the Des Moines office.

There is little room for employees who cannot “do it all” within Integer — and as such, I have developed a diverse skill set.

- ❖ Managing and motivating a diverse team of developers, systems administrators and technicians.
- ❖ Immaculate documentation standards and attention to detail across all projects.
- ❖ Forecasting and tracking of \$1MM budget, while ensuring maximum cost savings on hardware and software by coordinating purchases across Integer's offices.
- ❖ Project, vendor, audio/visual and facilities management/maintenance.
- ❖ Communication/workflow systems implementation and integration.
- ❖ Fault-tolerant cloud and VM hosting environment planning, implementation and administration.
- ❖ Software and font licensing, deployment and compliance.
- ❖ Infrastructure and network security planning, installation and administration.
- ❖ Assisting with RFPs, pitches, brainstorm — and frequent development of creative materials and templates.

IT Manager, Rocky Mt. Center for Health Promotion and Education Lakewood, CO 2002 - 2004

In the two years I worked at RMC, I standardized their communication tools, streamlined the grant writing and project management processes, redeveloped their web presence and provided ongoing technology training to a staff of 35.

Mac Genius, Apple Computer Littleton, Colorado 2001 - 2002

During my time at the Littleton Apple Store, I attended the Mac Genius training in Cupertino, CA, assisted in the store's grand opening and solved a plethora of end-user problems. I'm proud that I was able to be a part of Apple's retail success.

Information Tech/Lab Assistant, University of MN Dept. of Surgery Minneapolis, MN 1999 - 2001

When I began college, I had great interest in the medical field — particularly from an informatics standpoint. My freshman year at the University of Minnesota provided me the opportunity to work under two surgeons studying congenital heart and gastrointestinal defects. During my two years there, I helped them organize their research and constructed numerous patient databases cataloging the data. This provided a much better view into experiments conducted the previous 15 years, as well as ongoing studies.

Technician, Medical Arts Press Minneapolis, MN 1999

Supported creative and marketing departments in a mixed Mac/PC environment.

Solutions Specialist, Cybernet Systems Minneapolis, MN 1997 - 1999

Provided onsite IT client, server and network installation and support to various companies throughout the Twin Cities in IRIX, Linux, Windows and Mac environments.

Technician, First Tech Computer Minneapolis, MN 1996 - 1997

Performed hardware repairs on computers, monitors, printers and other monstrosities we called technology in the 90s.

Education

University of Colorado

Denver, CO 2002 - 2003

❖ One year of coursework in English and journalism.

University of Minnesota

Minneapolis, MN 1999 - 2001

❖ Two and a half years of coursework in psychology and biology.

About Me

I was born in Gießen, Germany, and my childhood included the pleasure of moving around a lot. During this time first home computer was an IBM PC followed by a Mac Plus and a plethora of other old school Macs. Eventually my family and I arrived in Minnesota — where I attended high school. I was the first student to carry a cell phone on campus. I promptly followed this up by religiously taking notes in class on a laptop, also the first in my school. Needless to say, I've been passionate about using technology from a young age.

My second passion is photography, which was kindled by my father being a professional photographer for the early part of his career. I've done freelance photojournalism, travel, wedding and portrait photography. Being technologically-inclined with a keen eye for visual composition has ensured everything I am involved in creating (from a photograph to a web application) has the audience's experience in mind and is designed to inspire them and simplify their lives.

A Few More Interests:

- ❖ Traveling and absorbing new cultures every chance I get.
- ❖ Not killing trees and reading great books on my iPad.
- ❖ Listening to great music from around the world.
- ❖ Driving a little too fast on my Italian motorcycle.
- ❖ Skiing-waist deep powder at Silverton Mountain, Colorado.
- ❖ Riding casual centuries on my road bike and finding awesome spots on my Kona.
